

TOOL INFORMATION

NO.14 March 2023

NEW RELEASE

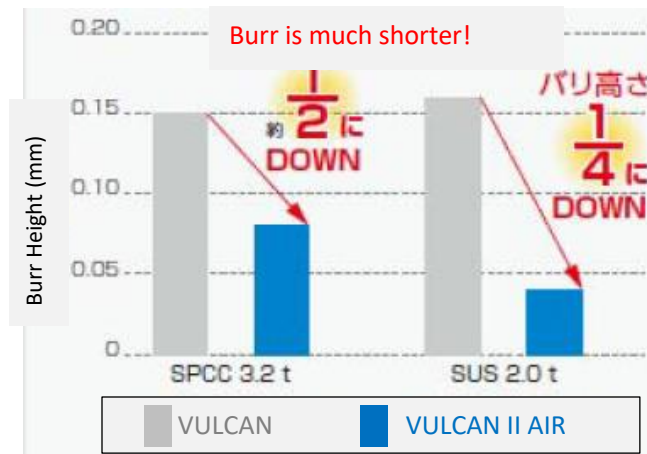

VULCAN II Air – Air blowing ability is added.

Compare with a precedent VULCANTOOL,

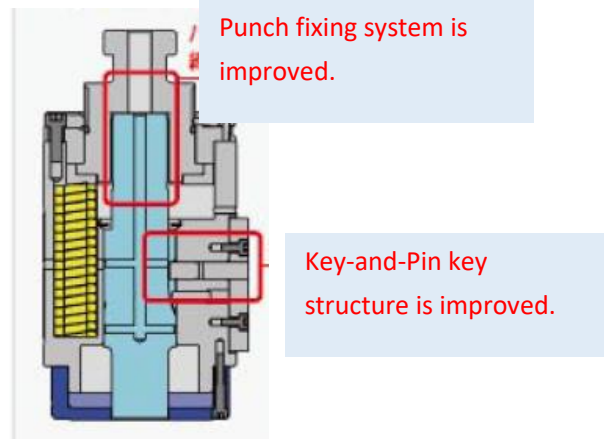

MFTOKYOエアブロー金型資料_20190724

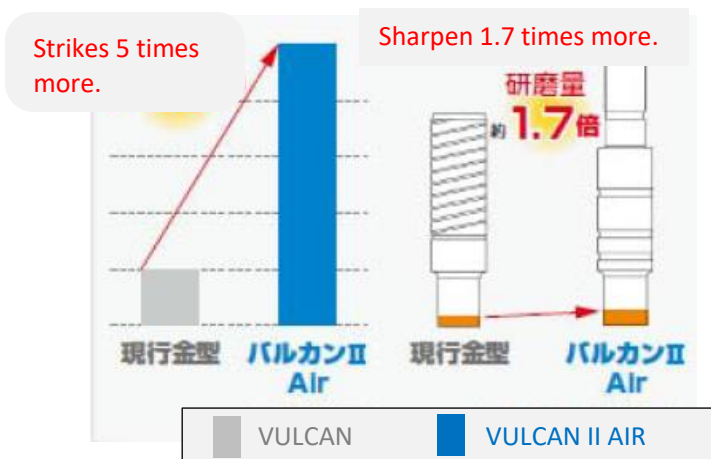

1. Better anti-burr result

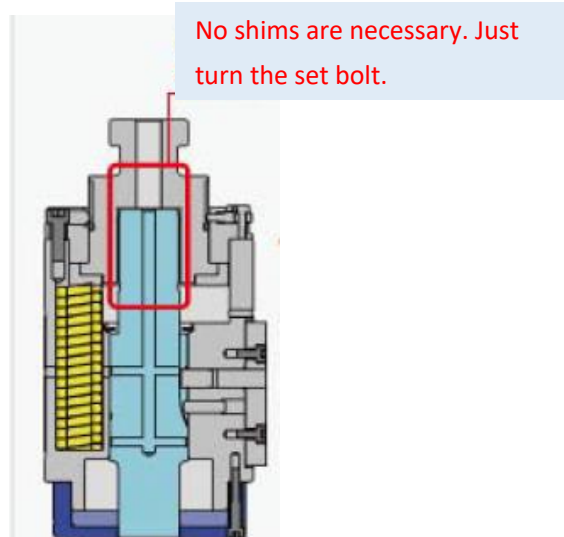

2. Smoother nibbling line

3. Longer service life

4. Easier Adjustment

NOTE: Motorum only. The machine shall be equipped with an air-blow element and HMI shall be installed into its NC controller. Ask us for further details for your machine to be ready for VULCAN II AIR tooling.

WHAT'S NEW?

*Coatings for punch of VULCAN II and VULCAN II Air are more reasonable now!
Compare with the old models!*

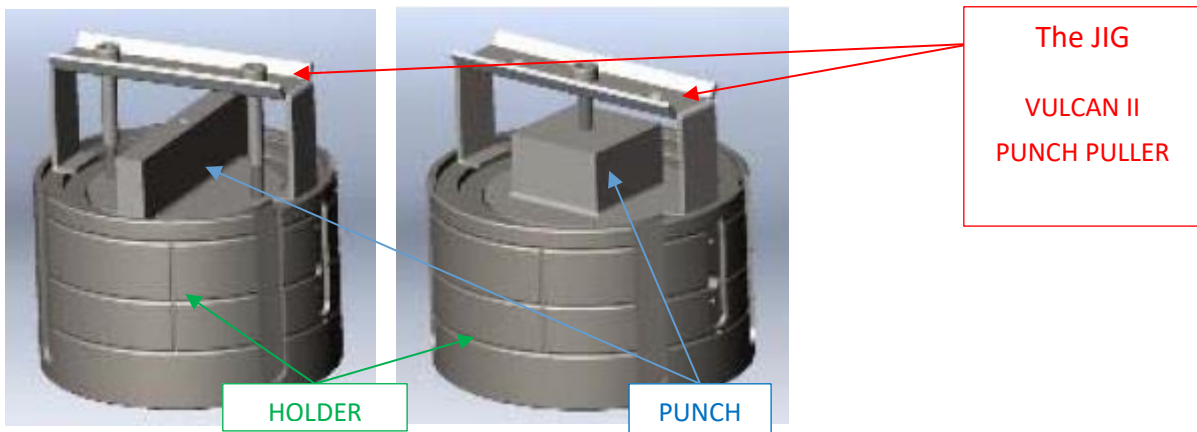

Ask your MURATA contact for further information

TECHNICAL REPORT

Q: Is there an easier way to take VULCAN II punch out of the punch holder?

A: Our special jig (optional) helps. See below.

Place the puller JIG on the punch holder. Use bolts (two for RECT and one for SQ) and turn the bolts with a wrench. The punch is pulled up.

OUT OF PRODUCTION

The sales of NB series, GUIDE PUNCH series and STYLE 112 (except INDEX D) series are all ended in late 2019. Thank you very much. VULCAN, VULCAN II and VULCAN II AIR now succeed to those old models.
